

## Hands

[Return to Cave Painting home page](#)

Hands are often seen in cave paintings. There is even a cave in Argentina called the Cave of Hands as the walls are covered in HUNDREDS of hands! Most of the hands are done by spraying around the artist's hand with paint made from dyes.

**Activity:** On a piece of paper, draw round your hands. Use red, brown or black crayons or spray paint and colour some in. Shade around others, leaving the hand clear.
